Updates on the situation in Spain
Diaconía España response to COVID-19
Madrid 23/03/2020

The situation in Spain continues to escalate dramatically and rapidly. As more and more people develop symptoms, some hospitals in the capital are already announcing that they are not taking in new patients. The whole country is in strict quarantine, and we have yet to peak.

During this time of unprecedented crisis, Diaconía is making available to the government housing in five different provinces in order to take in vulnerable people that might be infected and have no room in hospitals. Other evangelical organizations such as REMAR are teaming up with the government to house homeless people. The evangelical churches are also offering dozens of volunteers to the cities, they are keeping food banks open and even serving home-delivery. Also, chaplaincy services are offered freely and continuously by phone and WhatsApp.
